### Let's Build in Jr. Lego Engineering

Grades 1-3      6-Weeks      Thursday      4:30-5:45      Fee: \$105

Join us as we explore, investigate, & solve problems while we learn about the building blocks of engineering! A different LEGO® Dacta kit is used for each lesson, developing the concepts of structures and forces, levers, wheels and axles, gears and pulleys through construction of Lego® plans. Our engineers will explore levers, gears, pulleys, wheels and axles. Students will work in teams on building simple machines that are designed around creativity, exploring, investigating and problem solving in a fun group environment.

Some examples of the projects include a crane, merry go round, tractor, and more

### Lego Fun-Engineering with Simple Machines

Grades 4-5      6-Weeks      Thursday      6:00-7:15      Fee: \$105

This exciting hands-on engineering class combines LEGO® Education & LEGO Technic materials to explore motorized simple machines by building realistic models. Children will creatively solve challenges using concepts learned in class. A favorite is the trebuchet/catapult challenge where they propel LEGO pieces to see how far their building project will throw them.

Some examples of the projects include a folding lawn chair, drawbridge, conveyor belt, turnstile, and more!

**Space is limited to 12 children per class**  
**so register early**
