FAIRFIELD COVID 19 EXPOSURES

The Essex County Prosecutor’s Office, through the Essex County Office of Emergency Management, provides the Township of Fairfield daily with a list of any new COVID19 positive cases located within the township. They also report the total number of positive COVID19 cases.

Each week, the Fairfield Office of Emergency Management is in contact with the West Caldwell Health Department, the agency responsible for overseeing and clearing positive COVID19 cases for Fairfield. This is why the number of total COVID19 positive cases is different than the current number of active cases.

Lastly, the Essex County Office of Emergency Management also reports daily with the number of COVID19 related deaths. This is also confirmed with the Fairfield Municipal Clerk.

As of May 15, 2020:

- The Total Number Confirmed COVID19 Positive Cases Reported by Essex County OEM is 127
- The Current Number of Confirmed COVID19 Positive Cases is 45
- The Current Number of COVID19 Related Deaths is 17
